

Designated Smoking Areas.

Effective October 1, 2010, amendments under The Tobacco Control Amendment Act prohibit smoking within three metres of doorways, windows and air intakes of all public buildings.

Innovation Place remains a smoke free environment within our buildings and we are relocating our cigarette disposal units (or ashtrays) to a minimum of three meters from every public access doorway in order to further limit exposure to secondhand tobacco smoke.

Please encourage your employees to utilize the designated smoking areas highlighted on the attached Innovation Place map. If you work in a building that doesn't have a designated smoking area please be respectful and refrain from smoking within three metres of any doors, windows or air intakes.
